CAPACITY

# HEAVY LIFTING WITH A SMOOTH RANGE OF MOTION

The new Genie SX-125 XC boom is engineered to work in more applications that require higher capacities. With industry-leading dual lift capacity - 660 lb (300 kg)/1,000 lb (454 kg) - a smooth operating envelope, this new XC boom lift is a perfect fit for your customers heavy lifting in construction, bridge inspections and maintenance, stadium and sports arena, gas and oil refineries, industrial, telecommunications and utility applications.

This boom can help deliver higher rental return on invested capital (rROIC) for your business. We packed it with performance-enhancing features, including 80-ft (24.38 m) of outreach, the ability to work 8 ft 10 in (2.69 m) below grade and a stable 12 ft 11 in (3.94 m) x 13 ft 6 in (4.11 m) operating footprint.

To maximize your rROIC, the new SX-125 XC model shares commonality in design, parts and accessories with the other Genie products in your rental fleet.
