# NEW GENIE® S™-80 XC™ & S-85 XC MODELS UPDATE OUR MOST POPULAR TELESCOPIC BOOMS

With the ability to perform a wider range of heavier lift tasks on construction and industrial jobsites, Genie® telescopic S™-80 XC™ and S-85 XC booms now offer a dual lift capacity of 300 kg (660-lb) unrestricted and 454 kg (1,000-lb) restricted. Our Xtra Capacity™ (XC) feature gives your customers the ability to work with up to three people onboard while still leaving room for tools and jobsite materials. These XC models also have been updated with a state-of-the-art CAN-based control system, which incorporates the familiar SmartLink™ control system features on these popular booms. Operators will find the control layout to be consistent and intuitive, making the operation of the booms easy and straightforward.

**The benefit to the owner:** Easy to spot on jobsites, “XC” machines are a unique response to a growing worldwide market trend. Renting machines with Xtra Capacity can increase your rROIC, boosting your profitability quickly.

**The benefit to operators:** Xtra Capacity can reduce the number of lift cycles, as well as the amount of equipment your customers need to get tools and materials to work areas at height. Doing more with a single unit saves time and increases productivity.
