

SL 20 AERIAL WORK PLATFORM

AERIAL WORK PLATFORM

The **SL 20** aerial work platform is probably the most competitively priced unit of its type available in Britain today. Designed principally for the rental industry, its tough, rugged dependability and low maintenance needs, make it a high performer and a high earner.

For the first time, **INSTANT ZIP-UP** designers have used the single ram principle for the articulated arm which can smoothly lift up 3 men and materials to a working height of 26 feet.

Battery powered with an inbuilt charger system, all the functions of the **SL 20** are controlled from a platform mounted control panel which can also be detached for remote control manoeuvring. And its dual wheel drive and 16" solid rubber tyres easily cope with gradients of 20%.

With its compact profile - it is only 32.5" wide with a 96" long platform - the **SL 20** will easily pass through a standard doorway with its guardrails lowered.

These proportions also simplify transportation, the unit fitting easily onto a standard trailer.

A highly manoeuvrable high performer, rugged in operation, simple to maintain and low in price makes the remarkable **SL 20** tailor made for both the plant hirer and the industrial user.

Component duplication with other machines in the **INSTANT ZIP-UP** aerial platform range, together with the company's national service teams, ensure that **SL 20** downtime will be minimal thus further guaranteeing machine utilisation and high return.

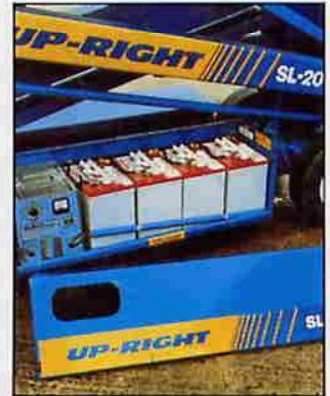

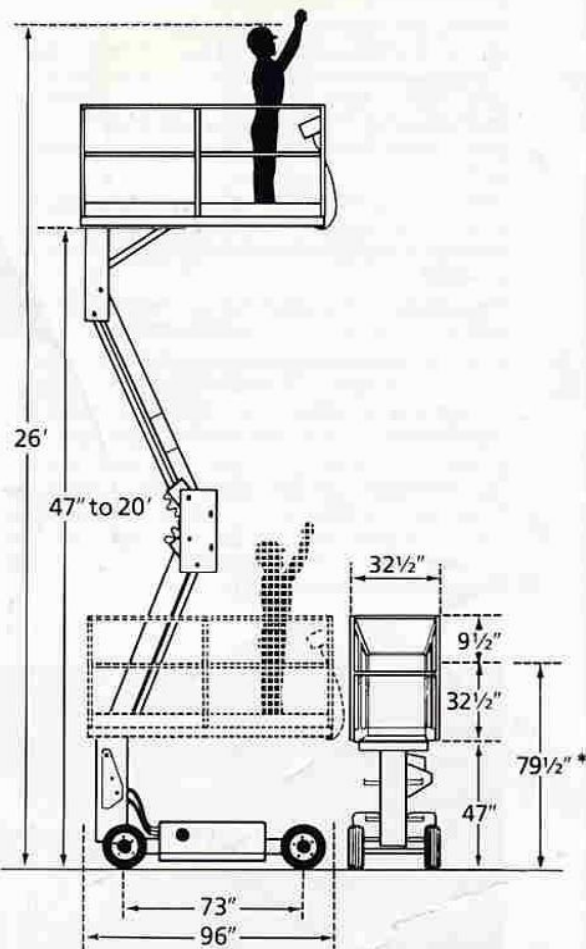

SL 20 AERIAL WORK PLATFORM

SPECIFICATIONS

Item	SL-20
Platform Size	30in x 96in
Maximum Platform Capacity	750lbs
Standard	550lbs total capacity
With Optional Cage	26ft
Working Height	20ft
Maximum Platform Height	47in
Minimum Platform Height	24 volt battery pack: 4 H.P. D.C electric motor
Energy Source	Four 220 amp batteries
Battery Charger	25 amp Battery Charger
Battery Duty Cycle	25% for 8 hours
Lift System	Single lifting cylinder
Driveable Height	20ft
Surface Speed	0 to 2.0 MPH
Platform Lowered	0 to 0.6 MPH
Platform Raised	4 gallons
Hydraulic Tank Capacity	

Dimensions	
Weight	2830lbs
Overall Width	32.5in
Overall Height	89in
Overall Height, Guardrails Lowered	79.5in
Overall Length	96in
Control System	2 speed – forward & reverse
Drive Control	Toggle switches for all functions
Horizontal Drive	Dual wheel; hydraulic motors
Wheels	16in diameter solid rubber
Braking	Spring applied, hydraulic release parking brake
Toeboard	6in high
Guardrails	42in high
Turning Radius	114in outside, 88in inside
Gradeability	20%
Wheel Base	73in
