

Introducing the...
smallest scissor lift
in the world.

X- Step is the friendly and safety conscious alternative to Steps or the Podium when working around heights of up to 3 metres.

Major advantages of the **X-Step** are its flexible height adjustment at the push of a button to any height within its range.

The ease of the **X-Step** to be pushed and manoeuvred into position even in those tight working spaces against a Podium which can prove difficult awkward and clumsy.

Another feature of the **X-Step** is the ability to carry your tools and parts whilst you push to the job site.

BISON
PRODUCTS

Features

- 3m working height
- Passes through a single doorway
- Easy to manoeuvre
- Easy to lift
- Easy to transport
